Subject: changes to analytical methods on the Class V permit to match the Class III permit
Attachments: TR RAI June 2011 Table 6.1-1.pdf

Hi Rick,

During our call I remembered that one of Powertech's comments was about the analytical methods in the Class V permit table 8. I have attached the updated NRC table 6.1-1 which has the analytical methods I matched in the Class III permit.

Thanks for your input during the call to help me keep on track with the MCL list!

Valois
